DETAILED ACTION

1. Applicant's election without traverse of the invention of Group I and the figures 5B and 9B species in the reply filed on 18 October 2004 is acknowledged.
2. Claims 8 and 22-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 18 October 2004.
3. Claim 8 appears to be drawn to a different species.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 and 9-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The attempt of making independent claims 1 and 13 generic only renders them indefinite in that the base and the handle are different elements thus the use of the alternative to attempt to claim both embodiments in one claim only renders all the claims indefinite.

The embodiment claimed in claim 7 is not understood as it is impossible for the tool to be bi-directional if there is only one blade, as is claimed in claim 1, from which this claim depends.

Art Unit: 3723

It is unclear as to what is meant by claims 10-12 as the blades cannot extend toward the base and away from the handle if the handle is on the base, as disclosed.

There is no antecedent basis for "the central portion" in claims 4-7; "the first end" in claims 5-7; "the first and second ends" in claims 5 and 7; "the plane of the at least one wheel" in claim 7 and "the blade" in claims 10-12.
